

## CBCA Rule on Length of Water Craft

No motorized water craft (excluding pontoon or sailboats) exceeding 24 feet, 4 inches in length, as determined in accordance with United States Coast Guard regulations, are permitted. Length is measured from the tip of the bow in a straight line to the stern. This does not include outboard motors, brackets, rudders, bow attachments, or swim platforms and ladders which are not a molded part of the hull. See illustration below.
