

ZEBRA MUSSEL BOAT RAMP RULES

- The boat ramp will be locked year round.
- Only Board members will have access to a key; residents will not be issued keys.
- Board members will assist members in accessing the boat ramp.
- A log will be maintained at the boat ramp recording when each watercraft leaves the lake.
- If a watercraft needs to be taken off the lake for maintenance or for use in another body of water, a board member will attach a numbered zip tie to the watercraft bow eye and safety chain/tow strap.
- No zip tie will be required for watercraft taken off the lake at the end of the season; but such watercraft will not be permitted back on the lake until the following year.
- Any watercraft taken off the lake for maintenance will be permitted back on the lake so long as the zip tie is intact.
- If an owner declines to allow a zip tie to be installed or the zip tie is broken when the watercraft returns, the watercraft and trailer must be steam cleaned with a Hotsy or similar device by a boat dealer authorized by the board, after which a 14 day quarantine is required.
- If a member wishes to install a used lift or dock from another lake, the lift must be tagged by a board member after which a 14 day quarantine is required.
